

Child Safety

Create a Safe Home with Our Products

As our children grow, so does their curiosity with the world around them. Everyday household objects could become a potential danger to infants.

Silent Gliss puts safety first and has developed innovative products that can reduce the risk of accidents. Our products not only enhance the look of any interior, they are designed with safety in mind.

Your Silent Gliss dealer will be happy to assist you in choosing the most stylish and functional system. Let us help you make your home more safe for children.

Approved by Silent Gliss

All systems featuring our child safety logo are thoroughly tested and meet the highest possible safety standards.

Reliability and Safety

Child Safety Device

Silent Gliss child safety device – an integral option for reliability and peace of mind. The device releases the operating chain or cord should the pulling force exceed 6kg or more.

Available for our best-selling cord and chain operated systems:

- Roller blind systems Silent Gliss 4905 and 4910
- Curtain track system Silent Gliss 3840
- Metropole Curtain Pole systems Silent Gliss 6120 and 6160
- Roman blind systems Silent Gliss 2320 and 2330
- Vertical blind system Silent Gliss 2810
- Venetian blind system 8300

This device is only suitable for use on Silent Gliss products.

Cord retainer

The Silent Gliss cord retainer is available for all chain/cord looped blinds and tracks. The cord retainer is fixed to the window reveal or wall and holds looped cords or chains taut to reduce the risk of an inquisitive child becoming entangled.

Our Products – Designed with Safety in Mind

Motorisation

A wide variety of Silent Gliss window treatment products are available with a motorised option which eliminates all lift cords or chains, removing any risk to children. The systems are operated at the touch of a button and from the comfort of your chair.

Spring operated roller blind system

Our spring operated roller blind system Silent Gliss 4900 is operated by a pull ball instead of the traditional chain – for enhanced safety.

Feel at Home – Feel Safe

Panel glide systems

Silent Gliss hand or electrically operated panel glide systems are the ideal choice for side-to-side openings or as room divider. Enhanced safety is guaranteed since no lift cords or chains are used.

Draw rod operated systems

Our curtains or panel glides can be operated by a single draw rod without the need for operating cords or chains.

“The Collection” from Silent Gliss

Textiles like curtains are the most common fire accelerant in buildings. In line with ever-present fire protection and fire fighting, measures to avoid human and property damage are very important.

With this in mind, all our fabrics are produced with flame retardant properties. Additionally, one fabric is even incombustible for the highest level of safety!

Practical and Simple Precautions

Please help by taking these simple precautions in your home:

- Examine every blind in the home. If any blind has a looped control cord or chain then “Make It Safe” – use a safety device such as the Silent Gliss cord retainer.
- Make sure that all blind cords/chains cannot be reached by children.
- Remember – even if children do not live in the home they may visit.
- Do not put sofas, chairs, beds or play pens near to window blinds as children love to climb.

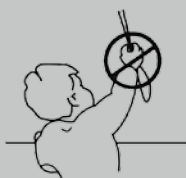

Our Systems at a Glance

Product group	Loop-free options		Safety options
